# About

Founded in 2017, BILD Tents & Structures began their operation solely in the events industry. Today, BILD work with some of Ireland's largest public and private events while also delivering solutions to hundreds of schools, bars, hotels and restaurants nationwide.

Over the years, our client's requests started to become increasingly more challenging and because of this, a team of experienced and focused crew members have grown within the company.

In 2022, BILD moved to a 5000sq. ft warehouse and workshop facility which gave them the ability to further develop a creative department.

Marrying the massive potential of this workshop with years of large scale rigging experience, anything is now possible.

# What We Offer

## SIGNAGE PRODUCTION

Multi-layered custom sign making for any occasion

## STAGE & BOOTH DESIGN

Unique backdrops and eye-catching features for event and commercial purposes

## EXHIBITION STAND

Attractive showcase pieces to increase brand visibility

## BESPOKE FURNITURE

One-off movables for indoor/outdoor events

# What We Offer

## **BRAND ACTIVATION**

Promotional creations to increase brand visibility

## **CONCEPTUAL DESIGN**

Developing a plan and visual representation of what a final product will look like

## **FESTIVAL PRODUCTION**

Creative and aesthetic aspects of all things festivals!

## **SET DESIGN**

Creative and visually compelling elements made to your specifications

# How it works

## CONCEPT/DESIGN

Initial design process where we generate ideas/concepts and discuss your requirements. Afterwards, we provide draft 3D graphics as a visual reference of your project.

## PLANNING

Once the design is complete, the fabrication process moves to the planning stage, where the materials, tools, and equipment needed for the project are identified, and a schedule for the project is established.

## FABRICATION

Afterwards, the fabrication process is carried out. This may include cutting, shaping, and joining materials using various tools and techniques, such as welding, soldering, or bolting. During the fabrication phase, quality control measures are taken to ensure the final product meets the required standards.

## INSTALL

After all the components are fabricated, they are assembled to create the final product. Once completed, our team arrive with specialist rigging equipment and install your bespoke piece with minimal disruption.

# Why Work with Us?

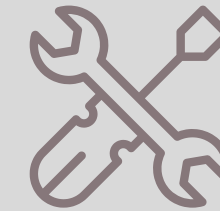

## FLEXIBILITY

BILD can handle projects of any size, from small parts to large-scale installations. Allowing clients to scale their projects as needed, and adapt to changes in demand.

## CUSTOMISE

Understanding your needs and requirements, BILD will create a product that meets your unique specifications and requirements.

## MAINTENANCE

Post-production support, such as maintenance, repair, and upgrades, which can help to prolong the life of your product.

BILD.

# Workshop

Our CNC machine is a powerful tool that provides numerous benefits for both our company and our clients.

The machine is able to perform precise cuts and shapes on a variety of materials with a high degree of accuracy and repeatability. This makes it ideal for manufacturing a wide range of products, from small parts to large assemblies.

Ideal for manufacturing a wide range of products, from small parts to large assemblies.

Benefits:

- Cost savings
- Improved quality
- Produce parts and products at a higher speed
- High degree of precision and repeatability

# Visualise

By working with our designers, clients can expect to receive visual representations of their projects that are professional, engaging, and effective, which will help them to better understand and allow them to communicate the project vision to their target audience.

“

If you BILD it, they will come.
