

# CREATE MORE SPACE

B I L D.

# ABOUT

Founded in 2017, BILD Tents & Structures began their operation solely in the events industry. To date, BILD work with some of the UK & Ireland's largest public and private events from music festivals and exhibitions to weddings and corporate showcases.

Over the years, our client's requests started to become increasingly more challenging and because of this, a team of experienced and focused crew members have grown within the company.

In 2019, BILD decided to spend more time focusing on how they could bring their large scale experiences to more compact locations and serve business courtyards and public spaces nationwide.

Whether for hire or sale, we want to be able to offer as much versatility to our clients with our business solutions as we do with our event solutions.

# WHAT WE OFFER

## **STRETCH TENT**

Beautifully crafted, 100% waterproof stretch tents

## **GEODESIC DOME**

4.2m cone feature with 1.8m head clearance

## **BREAKOUT POD**

Fully transparent sound reducing pod with 3 sq.m Floorspace.  
Suitable for up to 12 People.

# HOW IT WORKS

## CONSULTATION

We discuss your requirements by phone/email, then visit your site to provide custom-made 3D graphics as a visual reference of your installation.

## INSTALL

We install your bespoke structure. Our team arrive with specialist rigging equipment and fit your structure safely with minimal disruption. Installation time usually take a day to complete.

## MAINTENANCE

Through our mailing list, our team will send helpful weather reminders. When your structure/canopy is no longer in use our team remove, clean and store until needed again.

# WHY WORK WITH US?

## BRANDS

Our bespoke structures come in all sorts of colours and sizes. Branding and logos can be added during the manufacturing process.

## REVENUE

Being able to accommodate more people means more revenue for you and your investors. We work to utilise each venue's space.

## NOISE

If you're a rooftop bar, beer garden or pop-up in a built up area BILD can assist with noise reduction.

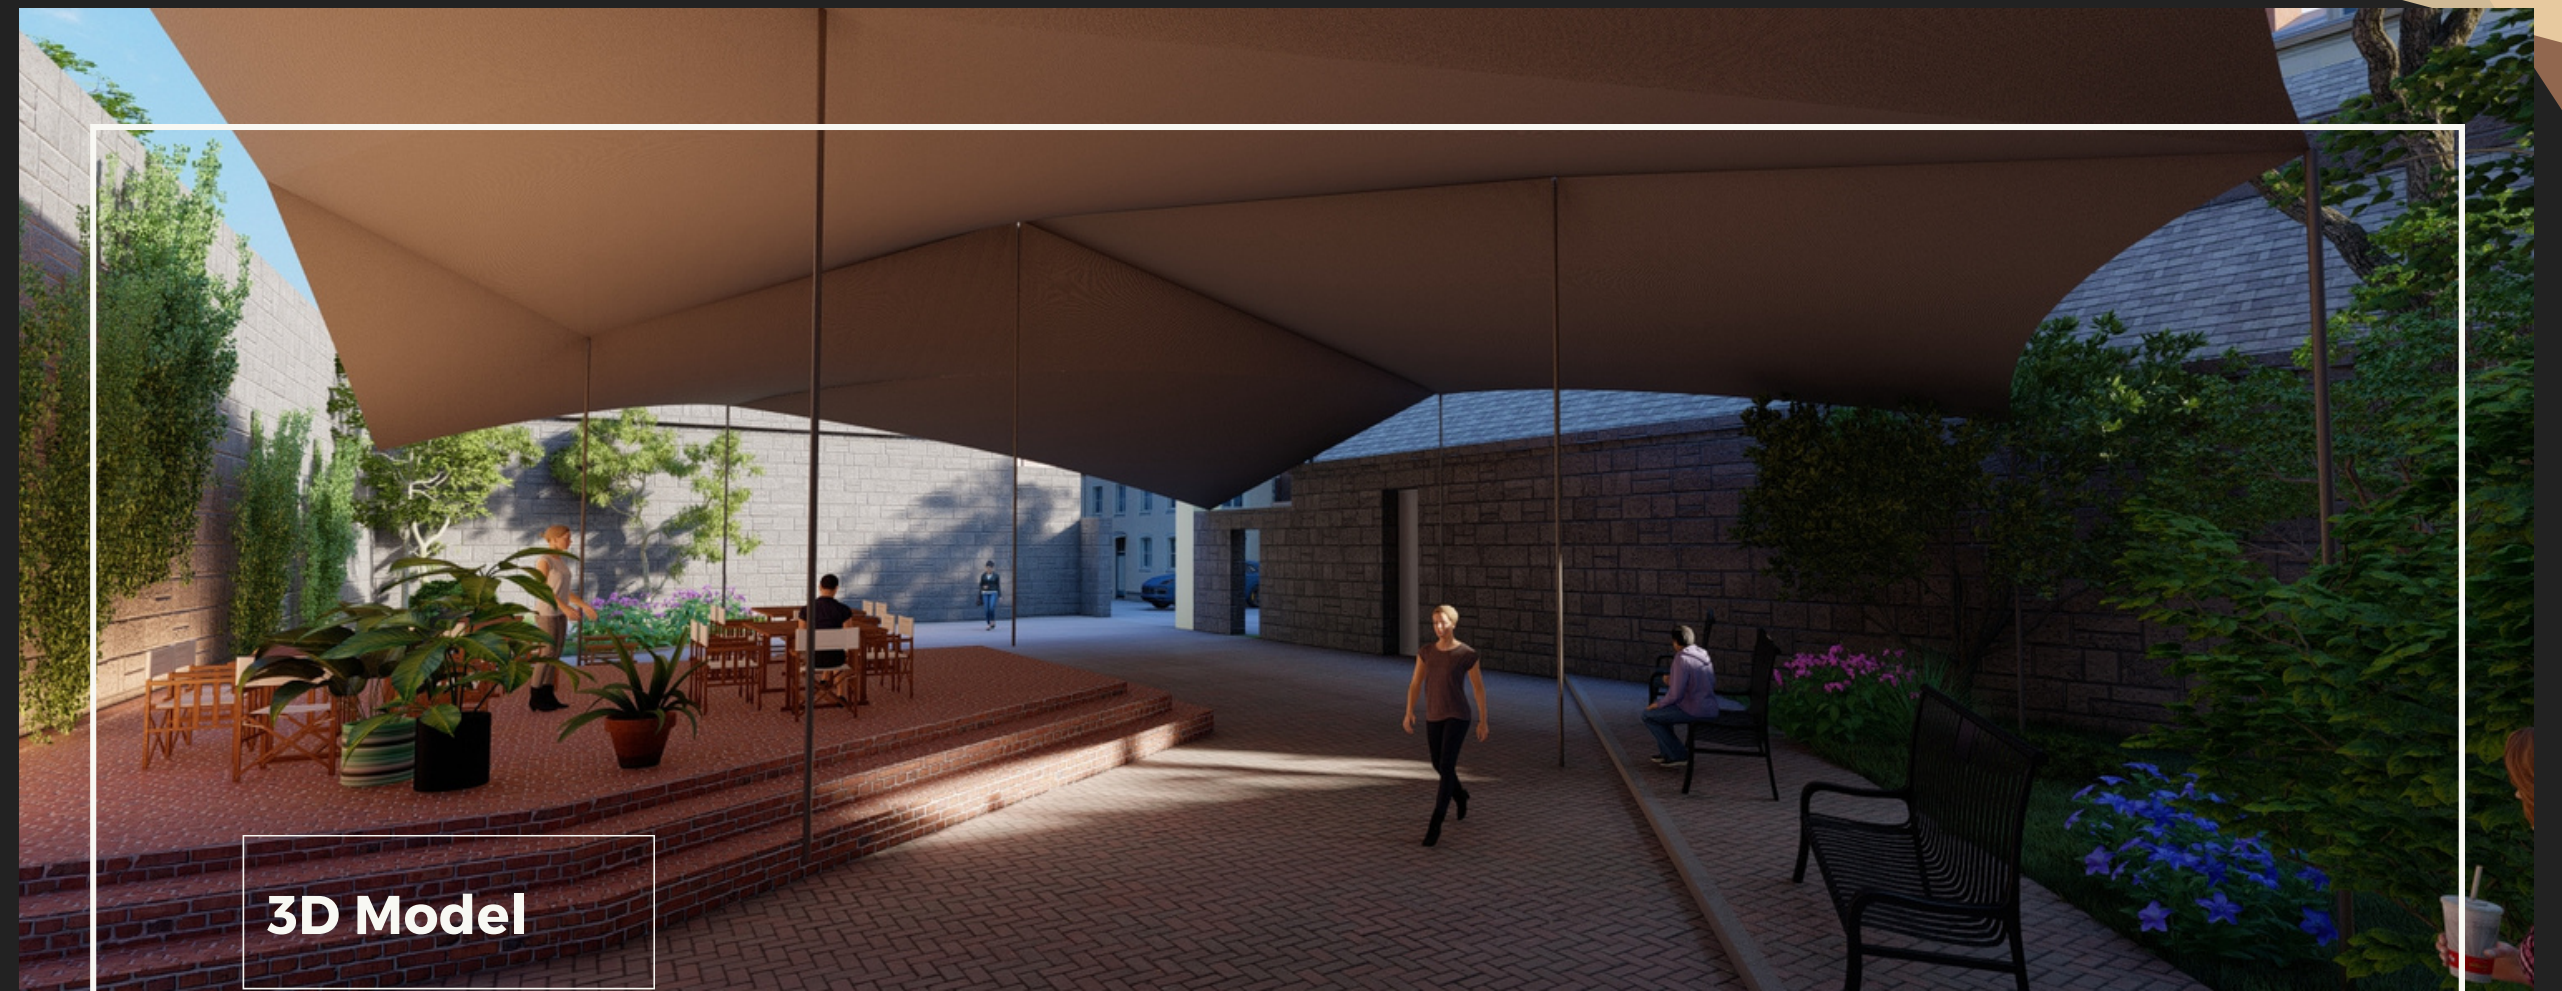

# VISUALISE

- ALLOW OUR DESIGN TEAM TO REPLICATE YOUR VENUE AND SHOW YOU WHAT TO EXPECT BEFORE YOUR INSTALLATION.

# VISUALISE

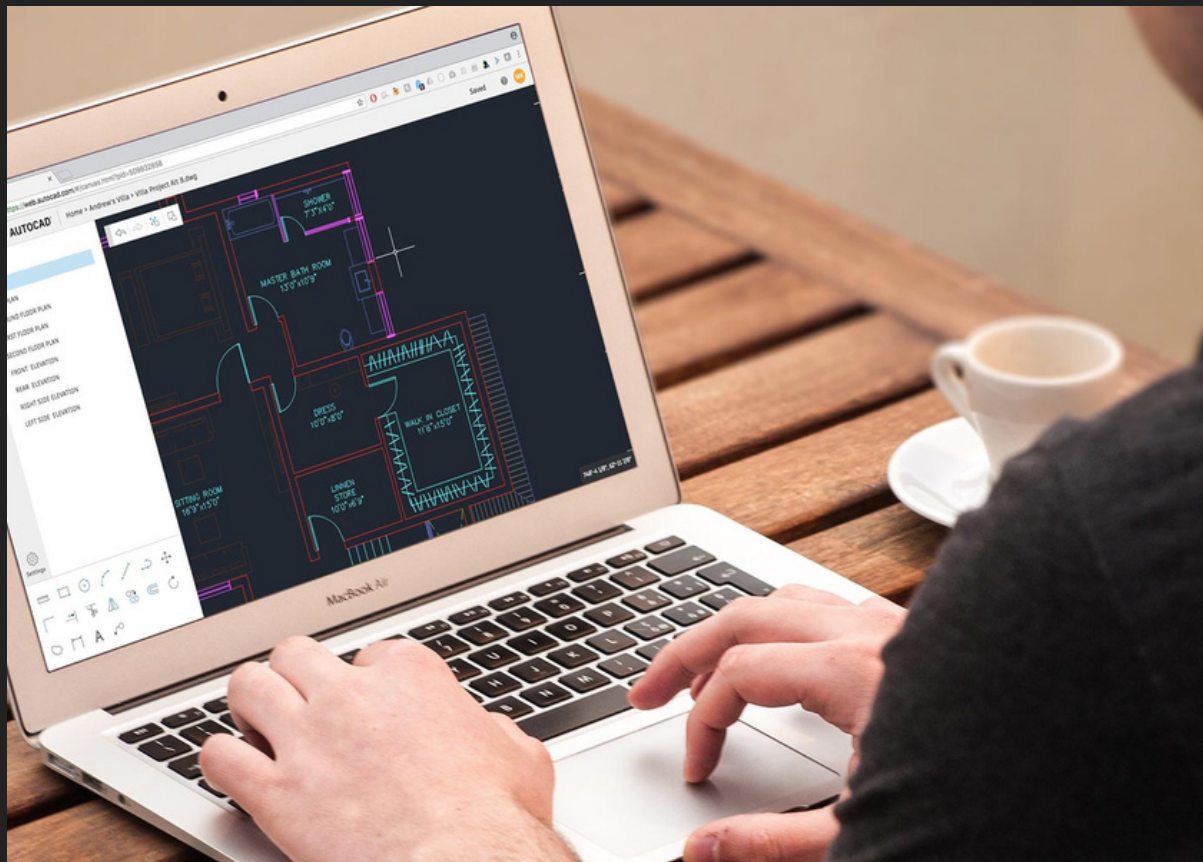

# MEASUREMENT/DESIGN

High accuracy and precision of measurement – our laser rangefinder can measure distances with millimeter precision and achieve results with very high repeatability.

We record and project millimeter-accurate CAD drawings with exact angles and curves on site to give increased clarity of your installation.

B I L D.

# RIGGING METHODS

- Steel Posts - Using either galvanised or powder coated posts
- Anchor bolt - We can install fixed or removable nut & bolt fittings with the security of chemical mortar resin

# BRANDING

Branding is a way of clearly highlighting what makes your offer different to, and more desirable than others.

We look at optimising as many blank canvases on your premises and using them for effective marketing positions.

As well as this, a lot of our products allow for direct print options for your company logo.
